PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering student specializing in Data Science and Artificial Intelligence. Hands-on experience in Python, Java, Flutter, Node.js, PostgreSQL, web development, computer vision, and networking. Built practical software projects including a real-time face recognition security system and an ISP management application, alongside applied experience in FTTH networking, OLT/ONT technologies, customer management, and ISP operations.

TECHNICAL SKILLS

Programming Languages: Python, Java, Dart, JavaScript, SQL.
AI & Computer Vision: OpenCV, Face Detection, Face Recognition, Machine Learning.
Application Development: Flutter, Node.js, Express.js, REST APIs.
Databases: PostgreSQL, SQLite.
Networking: CCNA, FTTH, EPON, GPON, OLT, ONT, Fiber Optics, TCP/IP.
Web Development: HTML, CSS, JavaScript.
Tools: Git, GitHub, VS Code, Postman.

PROJECTS

FaceGuard - Face Recognition Anti-Theft System *Python, OpenCV, Computer Vision, SQLite, Firebase | 2026.*

- Engineered a real-time laptop security application using OpenCV YuNet and SFace, achieving 95% face recognition accuracy across authorized users.
- Built a guided face-registration flow capturing multi-pose facial data for 5 authorized users.
- Created unauthorized-user detection with alarm activation, snapshot capture, automatic screen locking, and event logging.
- Added email alerts with captured intruder images plus Firebase-based push notifications and remote-control features.
- Designed a desktop application spanning Dashboard, User Registration, Model Training, Logs, and Settings modules.

NexiNet - ISP Management System *Flutter, Node.js, Express.js, PostgreSQL, JWT | 2026.*

- Built an ISP management application handling 150+ customer records across plans and administrative operations.
- Developed the Flutter admin application and integrated it with a Node.js/Express backend.
- Set up PostgreSQL database integration for customer, plan, and administrator data.
- Secured administrator login with JWT authentication and bcrypt password encryption.
- Aligned the application design with real-world ISP management requirements.

Nexi Net Business Website *HTML, CSS, JavaScript | 2026.*

- Built a business website for Nexi Net to showcase broadband services, plans, and company information.
- Maintained website content and handled deployment for the business.

WORK EXPERIENCE

ISP Network & Technical Operations - Nexi Net *2021 - Present.*

- Supported 150+ broadband customers across day-to-day ISP service operations.
- Coordinated customer onboarding, service requirements, plan management, and technical support.
- Worked hands-on with FTTH, EPON/GPON, OLT, ONT, routers, and fiber-optic networks.
- Resolved customer connectivity and network-related issues.
- Gained hands-on experience in ISP operations and customer service management.

EDUCATION

Bachelor of Technology - Computer Science Engineering (Data Science & AI) *2023 - 2027 (Expected).*
Dr. M.G.R. Educational and Research Institute

CERTIFICATIONS & TRAINING

Cisco CCNA • Networking System Course • IBM Python Programming Course • IBM Java Programming Course (all completed)

ADDITIONAL SKILLS

Problem Solving, Technical Troubleshooting, Customer Communication, Project Development, Network Troubleshooting, Business Website Management
